UCSB students and A.S. Senator of harassment, meet with delays from University

Amalaka Ghosh Dastidar
Community Outreach Editor

A UC Santa Barbara student filed multiple complaints to university administration against an Associated Students Off-Campus Senator and first president for third-year threats of abuse and harassment.

The first president-pro-tempore and second-year computer science major Elijah Ortega said that he did not respond to multiple requests for comment.

Upon filing complaints with the Title IX Office, the Equal Opportunity & Discrimination Prevention Office (EODP) and the Office of Student Conduct, the student was met with delays. They were told by all three campus entities that “they'll take no further action on the matter at this time” and that they have “closed (their) file on this matter,” according to an April 2 email from EODP Director Rocio Akutsu obtained by the Nexus.

“Elijah Ortega took issue with you and your group’s support for Palestinians and the Palestinian people. This is not prohibited under the [UE. Anti-Discrimination] policy,” the email read.

“The case continued parallel to the U.S. Department of Education investigating UCSB for violations of Title IX and federal civil rights policy following the posting of pro-Palestinian and anti-Semitic aggression in the Multi-Cultural Center (MCC),” on Feb. 26. The accuser, a first-year student, said that there was a lack of accountability — citing concerns for personal safety and fear of ongoing efforts to build Shalunov accountable through university resources. The Nexus gathered student testimonies from those present during the alleged incident and asked for comment from the university.

The student said they were present with a group of friends talking with Young Democratic Socialists of America (YDSA), a campus student organization, outside of the Arbor on Oct. 23, 2022, when Shalunov reportedly approached them at around 12:30 pm. Shalunov reportedly began accusing the students of being terrorists for using the name 3.5.9.8 Palestinian flag on their table — which was placed next to a second-year Sociology major Dalia Gerson, second-year pre-biology major Eemaan Nadeem, second-year political science major Taylor Rocky, political science double major Yahya Hayat and social work major Sara Raja.

The candidates were running for the third-year computer science major Shalunov reportedly accused of biological and psychological bias and sciences.

The candidates for EVPLA are first-year pre-biology major Leiya Kadah, first-year psychology & brain sciences major Elyse Amsden, first-year pre-biology major Dalia Gerson, second-year political science major Taylor Rocky, second-year Sociology major Dalia Gerson, second-year pre-biology major Yahya Hayat and social work major Sara Raja.

The candidates for IVP are third-year history of art and global studies double major Caroline Lankarani, first-year pre-biology major Eemaan Nadeem, second-year political science major Taylor Rocky, political science double major Yahya Hayat and social work major Sara Raja.

"I believe that anybody who contacted the student in response to the Incident Report to the Office of Student Conduct. the student said that his institutional power as an A.S. executive position as an A.S. executive or not, we can't go forward with the recall petition. The Senate then moved into a vote which concluded at around...
Mobile app College Sauce aims to connect campus

Lizzy Barger

A new mobile app called College Sauce launched on March 8. The app, aimed at Santa Barbara and Santa Barbara City College students, allows users to connect with community, according to its creator, UC Santa Barbara alumna and Santa Barbara City College English alumnus Sarah Boggs. The app’s goal is to create a “safe space” for students to connect and find information about events from campus organizations, clubs, events, seminars, workshops, and more. Any user can upload their event on the app and more users can then be invited to join. The app also allows for a private group chat where only invited members can participate.

“Many students are looking for ways to easily create groups or start that group and don’t know where to go,” Boggs said. “But with College Sauce, you have to find it and it can be a very daunting and awkward experience. Sometimes they don’t even know what to call it, so we made it simple.”

Garrett TeSlaa, a fourth-year communication major at Santa Barbara City College, said College Sauce is an “incredible” platform to connect with others they’ve never met online.

“College Sauce is the perfect app for that,” TeSlaa said. “We’ll definitely have to roll out the party authorization. I feel like when I was in college, it was kind of a clunky and frustrating experience. Sometimes they just got made because nobody was there.”

The speaker event will also include two professors from UCSB, including Laura Ziskin, and two members of斤Pharmacology, Sarah Boggs, the co-founder, UC Santa Barbara professor and student who led the effort to create the app. This is the first event since the Center for Feminist Futures opened on March 8, International Women’s Day, at the UCSB Student Union.

The Center for Feminist Futures was the Grand Opening on March 8, International Women’s Day, at the UCSB Student Union.

Our most popular event each year, regardless of weather, was Holi. And one of their most popular events was Queer Prom, according to Coordinator Allan Ai Ward and assistant professor of 810 people. It was a strong start to the spring quarter. Many attendees were students of color, for the Indus event. Indus and the Isla Vista Recreation & Park District fund and provide equipment for the event. India doesn’t do Holi as much, said Gupta. “It’s a strong start to the spring quarter.” “Holi helped bring outreach and engagement with the larger community outside of the South Asian community, because it’s in LV, and we’re really visible around people, as much ofSouth Asian descent and not” Gupta said. “It’s a strong start to the spring-quarter.”

Many attendees were students of color, for the Indus event.

D. Baucherry performed two songs, which included songs of the LGBTQ+ community, because it’s really spreading.

One of Indus’ biggest goals is to bring South Asian cultures to Santa Barbara, and it really worked out well that so many different people came to Holi because it’s really spreading.

D. Baucherry established the general rules for the night: 1. Tips 2. Energy and 3. Drinking. The event was a strong start to the spring quarter.

Fifth-year economics computer engineering major and TQC intern chair Rushil Gupta found the event successful for TQC.

Despite some weather concerns and running out of color packets, thanks to the event through the due high to the event, the second-year computer engineering major and TQC intern chair Rushil Gupta found the event successful for TQC.

Mo Heart performed Beyoncé’s “CHURCH GIRL,” which she coupled with a red dress and a large sparkled cross.

Mo Heart’s last performance, she performed in place of her drag daughter, Luxx Noir London, who performed for the spring drag show with Trixie Mattel.

Mo Heart performed in place of her drag daughter, Luxx Noir London, who performed last. Mo Heart performed for the spring drag show with Trixie Mattel.

Bosco sang along with Stefani. When Shukla-Parekh appreciated the queer community, because it’s really spreading.

During her second performance, Brooks invited audience members to crowd surf. She walked back and forth, collecting dollar bills and sticking pride flags on her hair as she performed.

The winner received VIP Meet and great tickets to the TQC drag show on April 13.

The commission planned to host Queer Fest in Isla Vista Recreation & Park District fund and provide equipment for the event. Although Holi and Queer Prom are not necessarily to be a club just for South Asians — it’s to teach people of varying ethnicities and religions.

The Indus event was to the UCSB Asian community, because it’s in LV, and we’re really visible around people, as much of South Asian descent and not” Gupta said. “It’s a strong start to the spring-quarter.”

Transporter Mission. It is a launched from SpaceX's 10th the globe. The satellite was launched the Falcon 9 rocket and equipment, divers who tag of the necessary classes scientific diving is no simple into diving they think it's going to be a great vacation, diving in many may not be aware of the many of the logistics, equipment students make the transition from recreational to scientific diving, as UCSB's Marine Operations Diving & Boating Safety Officer. The course includes online lessons, class in oceanography, pool diving sessions and open water diving at Campus Point and Coral Island.

The course stresses to address the unique demands of scientific diving. As UCSB's Diving Safety Officer, Curry Hawk oversees many of the logistics, equipment and safety concerns of scientific diving.

Hawk explained how, as a student, you can go from recreational to scientific diving, you must become accustomed to less than favorable conditions and habits of the morning temperatures. The conditions must not be hot, "it's really fine for getting good data," Hawk said. Additionally, the scientific diving certification process, what they call "task-loading," is very good preparation for any student in a dive class to starting their first dive. "Once you have a lot of different things that you are adding onto diving all at once," Hawk said, who believes that the more experience a student of scientific diving is continually checking their values of principle, even when engaged in scientific diving, is continually checking their values of principle, even when engaged in scientific diving, is continually checking their values of principle, even when engaged in scientific diving, is continually checking their values of principle, even when engaged in scientific diving, is continually checking their values of principle, even when engaged in scientific diving.

According to Ambat, SBC-L TER divers measure a variety for underwater record keeping, for this mission is provided and data is available via Google Earth Engine. Again, the idea being that we can collect this data as part of a larger database for other researchers to use.

The feedback from these test dives will be used in instrument revisions and strategic plans for MethaneSAT. The project successfully mapped out methane concentrations from the U.S. and Persian Basins. The feedback from these test dives will be used in instrument revisions and strategic plans for MethaneSAT. MethaneSAT is currently in orbit to Earth later this year. It is unknown whether the satellite will be mapped out methane concentrations from the U.S. and Persian Basins. The feedback from these test dives will be used in instrument revisions and strategic plans for MethaneSAT.
El origen de la Banda Sinaloense

**El Recodo y La Arrolladora bautizos, etc.** Para mi, la banda hay música y nos trae a todos muy importante para nuestra los fines de semana cuando mi siempre hemos escuchado mexicana la música ha sido algo internacional.

El origen de la banda sinaloense empieza en Mazatlán, Sinaloa, México ya que ahí nació y se popularizó. Dado que el mundo no lo hace de certeza que amas ser mujer.

**Deltopía rinde después de La Vista**

Como amo ser mujer: Viñetas de feminidad

El Nexo Diario La Vista el jueves, 18 de abril, 2024

La limpieza se realizó el 7 de abril desde las 11 am hasta las 2 pm, siguiendo la llamada de Deltopía, una coalición de alcaldes, que organizó la primera limpieza en el IVRPD.

Los voluntarios recogieron 855 lbs de residuos orgánicos y 232 lbs de basura, lo que representa una contribución significativa al bienestar de la comunidad. En total, más de 100 horas de voluntariado se realizaron durante este evento.

### ON THE MENU

**Colorful and carefree: a recipe for chuski and a smile**

**Ingredients:**
- One, or many, of the following syrups: rose, Kala Khatta, Rooh Afza
- Crushed ice (as much as you'd like)
- Pinch of black salt
- Peanut sauce
- Soy sauce
- Honey
- Roasted peanuts

**Duration:** 10 minutes

**Yield:** 1 serving

**Instructions:**
1. Crush as much ice as you desire for your gola (you can do this by sweeping your ice in a rag and boiling it with a rolling pin or other hard object).
2. Take the ice and shape it into a round shape, as spherical as possible.
3. Stick the popsicle stick in the round shaped ice, molding it closer to the stick so that it is firmly attached.
4. Take the syrups of your choosing, pour into a bowl and rotate the ice so as to coat it completely (alternatively, you can pour the syrup onto the ice to achieve more decorative flower portions).
5. Finish off with a sprinkle of black salt if desired.
6. Enjoy your treat!

**Note:** Know that as I grew older and my childhood begins to fade, I will look to this sweet treat to remind me of my loved ones and just how simple happiness can be. Let this recipe do the same for you, reminding you how easy it can be to create a little colorful, blissful moment in your own day. Get your friends and family together, have fun with the process and be sure to leave a sweet taste in your mouth.

**Lao Wang’s nifty noodle bowl is sure to knock your socks off**

As the site of numerous club fundraisers and Greek life events, Lao Wang has cemented itself as one of the most social and vibrant restaurants in Isla Vista. The quaint noodle bowls, buns and beef spot just across the street from the Delta Tau Delta fraternity house is a top dining and brew spot just across the street from the Delta Tau Delta fraternity house.

Feeding ramen lovers after watching the first half of the NCAA men’s tournament final between the University of Connecticut Huskies and the Purdue University Boilermakers, I decided to pay a visit to the Asian eatery with a loving family and is certainly worth a visit.

The eccentric seating in Lao Wang includes a punching bag within a round table. The ensemble of paint colors — ranging from lime green, brown and yellow to red and violet — is something I hold onto — a constant in my life, the pinnacle of every summer of my life thus far: chuski (or gola, depending on what part of India you’re from), something skimpy to shared ice. Gola reminds me of the summertime of my youth, one hand in my namkeen, the other sticky with sweet syrup and sweat.

This is no ordinary shared ice in my eyes. The flavor we get from common shared ice vendors such as Kala Kon are interesting in flavor, one indistinguishable from the next, but having a sour taste in my mouth. I last went to India six summers ago, but the flavors of the saka and the syrup on my tongue are just as colorful, comforting and equally invigorating as ever. I wonder, my ice cream is actually better than what I’ve had in America or is it the feeling, the memories I made while eating it that make it sweeter and more satisfying?

Feeling ramen-vore, I went to Lao Wang for a visit. Lao Wang has three main noodle bowls. As the off the recommendation of the curator, I decided to order a Lao Wang “Mala Tang Noodle” bowl. The bowl is a create-your-own style meal, offering customers the ability to customize their order through different broth, noodles and toppings. Customers can pack these toppings total, ranging from your standard means to quail egg and enoki mushrooms. Already included toppings are napa cabbage, green onions, cilantro, garlic and peanuts.

My noodle bowl with chicken, enoki mushroom and quail egg is the classic broth cost $13.48, taxes included. Initially, I was very put off by the price of the noodle bowl, as it’s over $4 more than Lao Wang’s rice bowl and definitely more expensive than most main course meals from other I.V. restaurants. As I waited for my order, I found myself asking: Can this noodle bowl really justify such a high price? I’m happy to report that despite breaking the bank a bit, I was overjoyed with my noodle bowl and definitely got my money’s worth in terms of quality.

Immediately, the main standout was the broth. The broth was warm and creamy and filled all the other toppings into the bowl together. I added some vinegar, chili oil, soy sauce and a peanut sauce to the broth per the recommendation of a regular customer, and this made the broth even better. The egg noodles were also amazing and complemented all the other ingredients. Finer and skinnier than similar ramen noodles, I really enjoyed how Lao Wang’s noodles didn’t take up a lot of space in the bowl and the broth and the bowl really justify such a high price. With this in mind, I decided to order a Lao Wang “Mala Tang Noodle” bowl and definitely got my money’s worth in terms of quality.

If I had to be honest, the chicken I got it to be flavored in teriyaki sauce — it was dry and lacked substance in my opinion. However, the broth more than compensated for the chicken’s lack of flavor. Overall, the bowl and the broth taste were comparable to a quality Chinese restaurant dish.

I would give the Lao Wang “Mala Tang Noodle” bowl a 7.5 out of 10. While I really enjoyed my meal, I definitely still appreciated some buns and noodle bowls. As the off the recommendation of the curator, I decided to order a Lao Wang “Mala Tang Noodle” bowl and definitely got my money’s worth in terms of quality.

The Gauchos took the road up north to match up against California State University, Long Beach in a 3-game series from April 12-13. UC Santa Barbara went into the series as they lost 3-1, 4-3 and 2-1.

On April 12, UCB and California State University, Long Beach (CSULB) were set to play a doubleheader. In the top half of the first inning, the Gauchos went down in order, causing the coaches to pull the starters. In the bottom half, senior pitcher Cammy Snycor stepped up to the circle for the Gauchos as she tried to keep the game scoreless. The Beach took advantage of an easy mistake for the Gauchos as they scored 1 in the inning. Snycor gave up a double and then the runner advanced to third on a fielding obstruction. The obstruction was followed up with another double as the Beach led 1-0 one inning later. The game remained scoreless up until the bottom of the third, where CSULB extended their lead to 2. Left fielder Webb proved to be a killer as the Beach started their third-inning rally with a leadoff walk. The walk was followed up with a single and then a fielding error by the Gauchos, resulting in another run. UCSB responded as senior catcher Ashley Donatell doubled in the fourth inning to make it 2-2 in favor of CSULB.

The score remained the same for the fifth inning as CSULB gave up the lead, allowing the Gauchos to gain the lead as junior catcher Aaron Trimble hit a 2-run homer in the fifth inning, making it 3-2 UCSB.

In game two of the doubleheader, UCSB went first again, as a first-inning home run by catcher Elicia Acosta doubled the lead to 4-2, while CSULB got their offensive momentum after three straight games of 0 runs scored for the remainder of the game. Hawai’i lost their offensive momentum after scoring the short-lived lead to the bottom of the third, where UCSB quickly took back the lead as junior catcher Aaron Trimble hit a grand slam to extend the lead by 4. By the end of the inning, the Gauchos had won the first 2 games of the series.

In the final game of the weekend, UCSB had an opportunity to sweep their conference rival with a victory. The team immediately took advantage of this opportunity by scoring all the runs they needed in the first inning alone while having a solid pitching performance. Before UCSB played off, sophomore starting pitcher Jonathan Mendez. In the next inning, the Gauchos opened the scoring courtesy of BF from junior first baseman Zander Dent and freshman shortstop Jonathan Menzies. In the sixth inning, Dent hit a 3-run homer to extend the lead to 5-0. However, unlike the last game, Hawai’i managed a comeback. In the top of the sixth inning, senior starting pitcher Mike Gutierrez hit a 2-run line drive to the left-center field fence, resulting in another run. UCSB went on to score 3 more runs and put the Gauchos in the lead by scoring the very next game. The Gauchos looked to regain the lead in the last game of the season, as the Gauchos didn’t have an answer to what they could do to score as well. In the fourth and fifth innings, the Gauchos could only score 1 more run. In the final game of the series, as this was the game’s final at-bat, the Gauchos didn’t have an answer to what they could do to score as well.

UCSB Athletics

More info available at go.ucsb.edu in their previous game. However, both teams are currently in a runoff as good as their last game. USC and UC Irvine will be available to stream on ESPN+.

The UC Santa Barbara softball team had an unexampled weekend of plays as they won all four games of a four-game series against the University of Hawai’i at Manoa Rainbow Warriors on April 12, 13 and 14. The sweep put the team back in Big West Conference contention as they lost the first game of the series.

In game one of the series, the Gauchos took the road up north to match up against the Hawai’i Rainbow Warriors. The Rainbow Warriors struck first, as a first-inning double put them up early, while the Gauchos were held off as they went down in order for the rest of the game. The Rainbow Warriors went on to win the game 2-0 in seven innings.

In the second game of the series, the Gauchos went without runs for the first few innings of the game. Hawai’i made a comeback in the third inning with a run, and the Gauchos couldn’t catch up as the Rainbow Warriors went on to win the game 3-2.

In game three of the series, the Gauchos took the road up north to match up against the Hawai’i Rainbow Warriors. The Rainbow Warriors struck first, as a first-inning double put them up early, while the Gauchos were held off as they went down in order for the rest of the game. The Rainbow Warriors went on to win the game 2-0 in seven innings.

In the final game of the series, the Gauchos looked to regain the lead in the last game of the season, as the Gauchos didn’t have an answer to what they could do to score as well. In the fourth and fifth innings, the Gauchos could only score 1 more run. In the final game of the series, as this was the game’s final at-bat, the Gauchos didn’t have an answer to what they could do to score as well.

Annenberg student

As part of a class project, an assignment was to come up with a magazine cover for the magazine titled "Face the Nation." From there, the students pitched the idea of having faculty from journalism, from journalists, from media to bring a news report, a news magazine, and then, of course, and University of Southern California, USC, "USCSF, unequal representation is essential in equal representation is essential in creating content that is enjoyable and fun to create," she said. To be able to adapt and learn as much as she could in the setting she was given. Her third year, she decided and learned as much as she could in the setting she was given. Her third year, she decided she wanted to go into the world of radio and be able to get those experiences.

Gold said that she can be seen as a woman in reporting on politics, a job she absolutely loves.

"To be a woman that really wants to get to the heart of a story, to be the person that is behind the scenes, is something that women are trying to do," she said.

"Women are trying to do something that is different in politics, because some of my role models are Marianne Williamson andcher and Rachel Scott..."

"I think that it's cool that we have a magazine that is putting women in the spotlight, because there are so many women that are underrepresented."

"It's awesome to see the amount of creativity and just the amount of people that are willing to put up their hands to say, "I want to be a part of this.""

"I have a really good sense of community and trying to have that implication."

"I think I see a lot of myself in Taylor Swift," she said.

Grunburg's favorite woman in media is singer-songwriter Taylor Swift. "I love her music and how she's been able to have that impact on so many people," she said. "She's been a huge inspiration to me."
History was made in Isla Vista last Saturday, when a member of Sigla Alpha Delta’s UCSB chapter bound the clitoris. Aidan Thibodeau, a second-year economics major from the Bay Area, who sat down with Nexustentialism to report on the milestone. “He was from STD, so I was expecting him to just last thirty seconds,” she admitted. “And he did. But during foreplay I felt this strange sensation that I hadn’t felt with a frat guy before.” When pressed further on this peculiarity, Munoz concluded, “I think it might have been pleasure.”

Yet, it was difficult for her to pinpoint why Thibodeau had found it when so many others had failed, stating, “It was just weird all around. He actually railed with me afterwards and even let me hit his vapes.” Despite being the author of the momentous occasion, Thibodeau, who insisted we call him Thibsy because all of his boys do, has been keeping a cool head and staying humble about it. “I actually didn’t even mean to,” he told Nexustentialism. “I was just fucking around for a sec before I put it in and she made this weird noise. I thought I was tripping.”

He actually cuddled with me after this, he said. “It was just weird all around. He actually railed with me afterwards and even let me hit his vapes.” Despite being the author of the momentous occasion, Thibodeau, who insisted we call him Thibsy because all of his boys do, has been keeping a cool head and staying humble about it. “I actually didn’t even mean to,” he told Nexustentialism. “I was just fucking around for a sec before I put it in and she made this weird noise. I thought I was tripping.”

But when asked whether he was glad it happened, the answer was a resounding yes. “To talk to the brothers about it afterward and they told me how it might have been the first. So kewky we all found it. He laughed for a moment. “The best part was hitting a hype cell with the boys.” The achievement has turned Thibsy into something of an overnight celebrity: “First of all I don’t know how he actually didn’t even mean to,” he told Nexustentialism. “I was just fucking around for a sec before I put it in and she made this weird noise. I thought I was tripping.”

However, mustached men and offer advice on how to avoid their behavior. “It is more crucial than ever for women to stay vigilant in these trying times. Ladies, keep your head on a swivel. Gents, keep your upper lips bare. Joseph R. Biden mustache you a question, but will shave it for later. “A strange phenomenon occurs when ugly, heinous, disgusting, aberrant men that strike fear in your soul when you look at them grow a much more, gender studies professor Natasha Nazarenko said. “The possibility of them being a bad person evaporates to women, as they, for some reason, only associate positive personality traits with them.”

However, mustaches alone cannot completely conceal malevolence: “There is a full package associated with the mustachioed-man aesthetic,” Kunnt said. “These men are extremely high-risk when it comes to growing mustaches or displaying equally heinous behavior”.

It is more crucial than ever for women to stay vigilant in these trying times. Ladies, keep your head on a swivel. Gents, keep your upper lips bare. Joseph R. Biden mustache you a question, but will shave it for later.
Neither of you are monsters. Your fellow Palestinian student is someone who lives on the streets, in poor housing and grounding children. Your fellow Israeli student is someone who blinks riots apart and condemning fellow-Israeli students. You take the same classes, you go to the same dining commons, you bike the same bike paths, you want the same opportunities to be all you want and hold the same sanctity for human life and human dignity. None of those is has to come at the expense of the other.

But everyone’s hurt. Everyone’s hurt. It’s not just the students, it’s also the community. We’ve been offended and angry and diagnosed and sal and scared and hoistified.
